work

My experience is primarily in full-stack web development, with some work in data infrastructure.

Facebook
Software Engineer (August 2017 - present)
- I work on the Privacy + Data Use team, building a product to provide greater transparency into the user data collected by Facebook's advertising services
- Previously, I helped build a native Facebook app for the Jio Phone, a low-cost 4G feature phone popular in India

BuzzFeed
Software Engineering Intern (May 2017 - August 2017)
- I worked on the Shopping team, building out their native advertising experience

Adobe
Software Engineering Intern (June 2016 - August 2016)
- I worked on the live website editor for Adobe Portfolio and made open-source contributions to ESLint, a popular JS linter

projects

Say My Name: Radio Story
- In my senior year of college, I produced a 16-minute story about the meaning of names in the Chinese-American diaspora
- I recorded interviews, wrote the script, and edited audio for the piece
- Listen here: https://saywordradio.org/#say-name

education

hackNY
Summer 2017 Fellow
- I spent a summer living + interning with a community of student programmers
- We engaged with the NYC tech scene, meeting and learning from data journalists, civic tech workers, and academics

Columbia University
B.S. Computer Science, 2013 - 2017
